

# S7 APP scan code adding instructions

First, the mobile phone is connected to the local wifi network

1: Scan or search "seetong" to download APP and complete registration

A screenshot of the Seetong app's login screen. At the top, the time is 14:06. The status bar shows various icons including a camera, Wi-Fi, and battery. The app's logo, a green 'C' with a camera lens, is centered above the name 'Seetong'. Below the logo are two input fields: the first for 'Email/Phone No.' with a person icon, and the second for 'Enter password' with a lock icon. A green 'Login' button is positioned below these fields. To the right of the button is a small 'Last login' label. At the bottom, there are links for 'Register' and 'Retrieve'. Below these links is a section titled 'Other login methods' with icons for Facebook, LINE, and WeChat. At the very bottom, there is a checkbox and the text 'I have read and agree User Agreement and Privacy Policy'.A screenshot of the Seetong app's 'Retrieve' screen. At the top, the time is 14:06. The status bar shows various icons including a camera, Wi-Fi, and battery. A back arrow is in the top left corner. The word 'Retrieve' is displayed in green. Below it are two input fields: the first for 'Email/Phone No.' with a person icon, and the second for 'Enter password' with a lock icon. Between these fields is a button labeled 'Get verification...'. Below the password field is a text block: 'Password(8~32 characters, contain two or more types of uppercase / lowercase letters and numbers, and A1234567 and a1234567 cannot be used)'. At the bottom is a grey 'Reset password' button.

## 2: Successful registration, login to APP

### 3: Upper left corner scanning device 2D

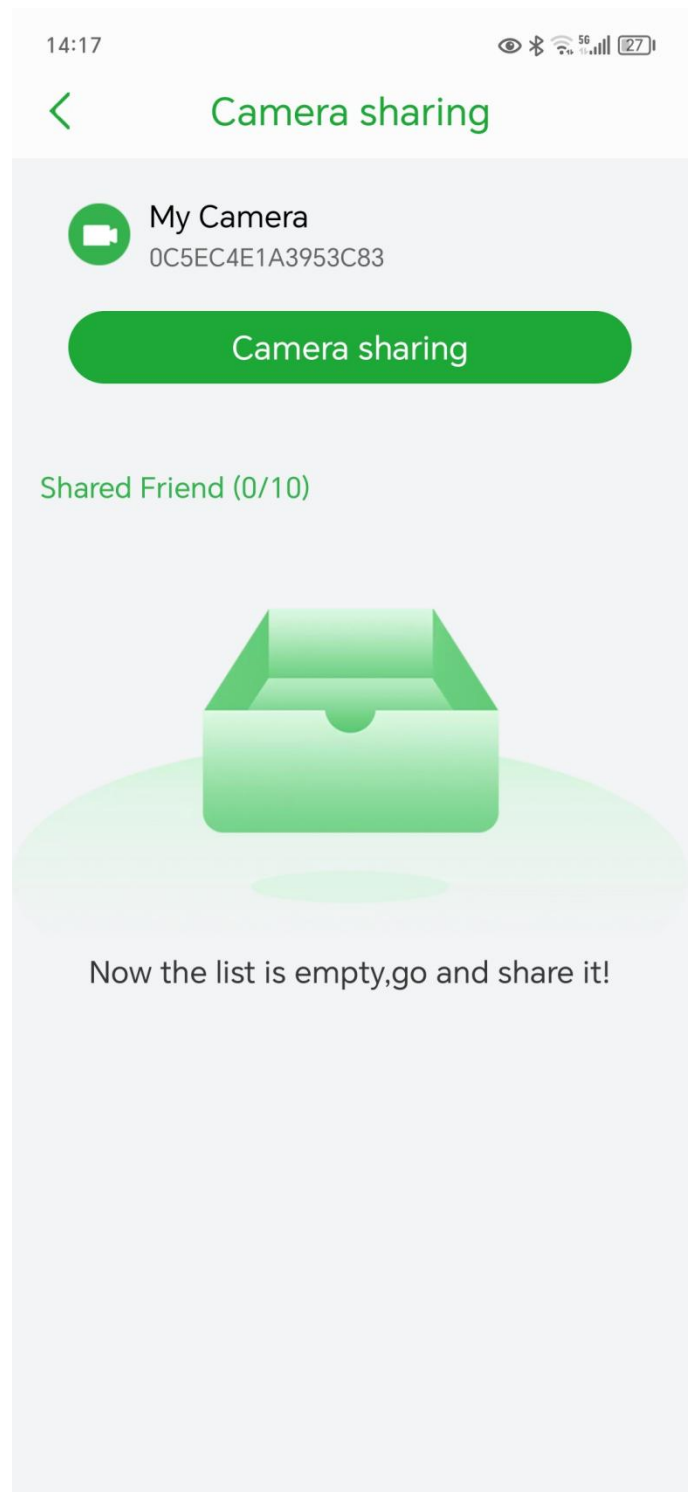

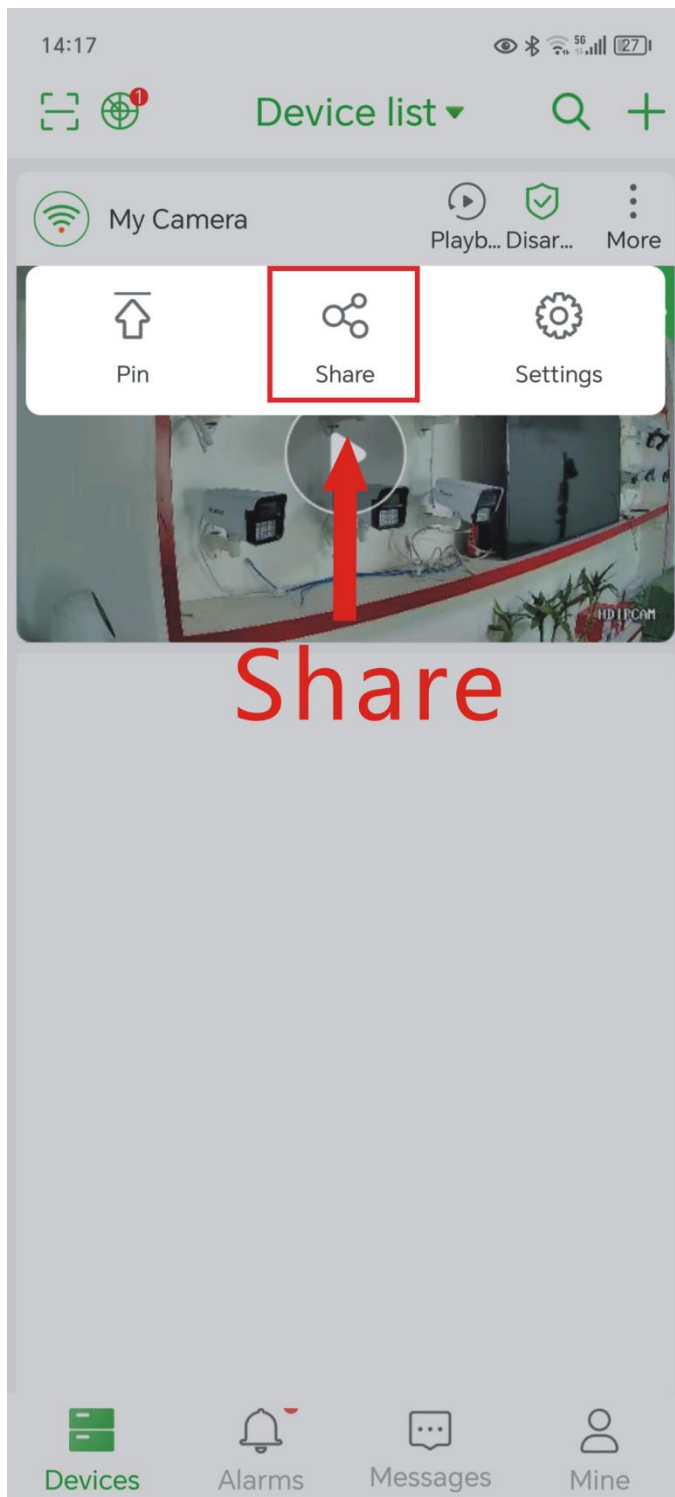

4: Select the network to connect to. If correct, proceed to the next step. (Currently, 2.4G networks are supported, but 5G is not.)

## 5: Network connection successful

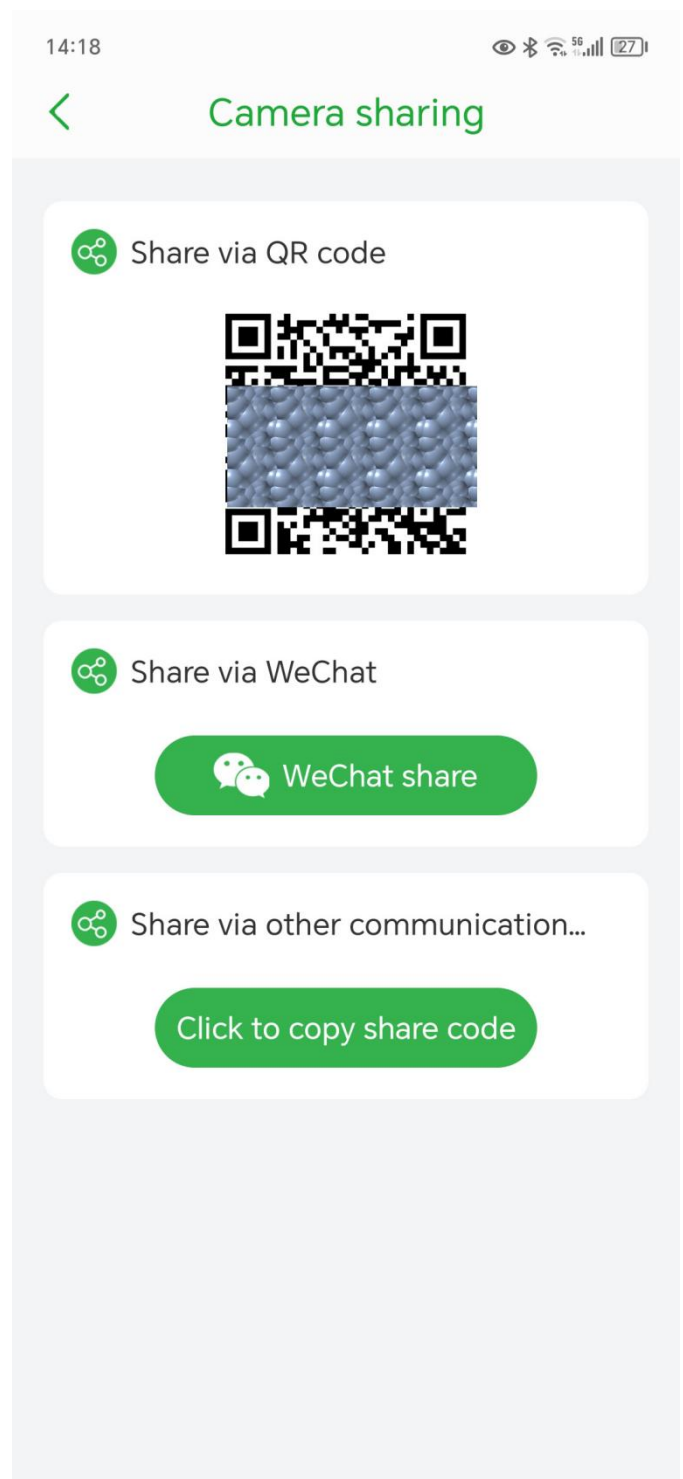

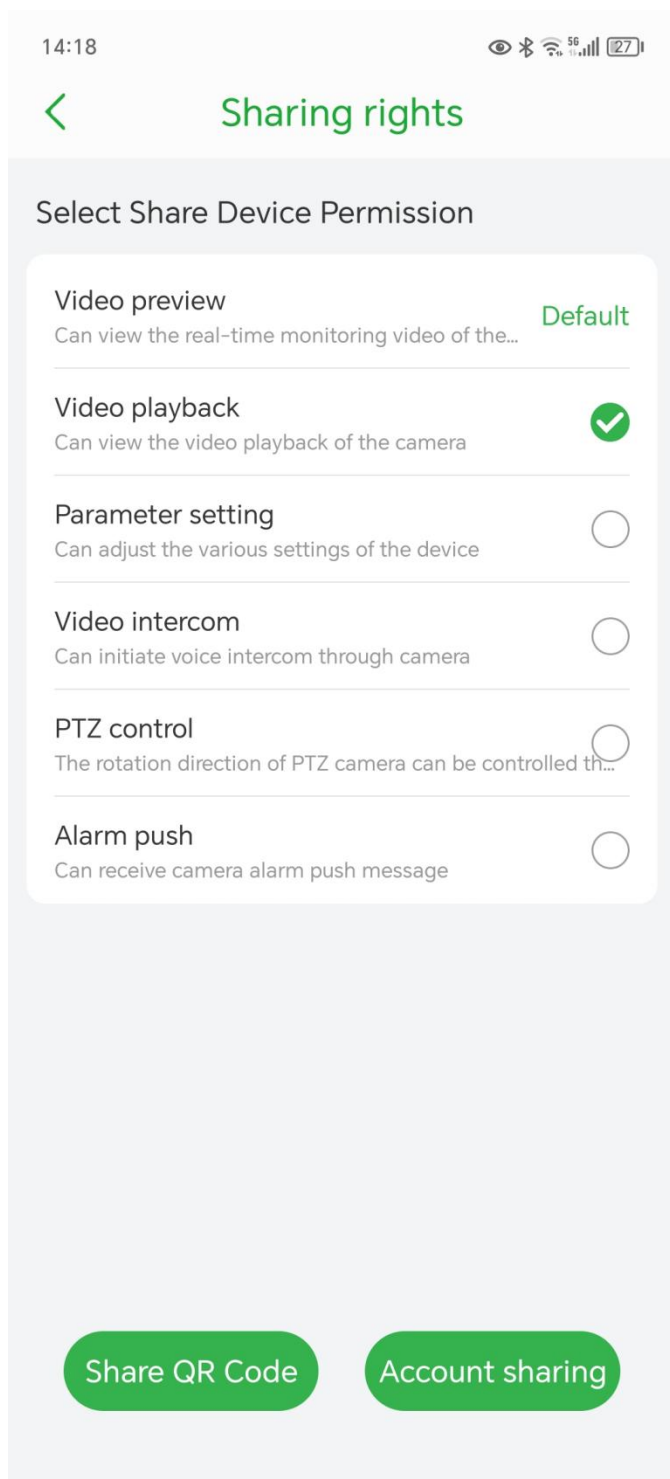

## 6: Share videos with family and friends

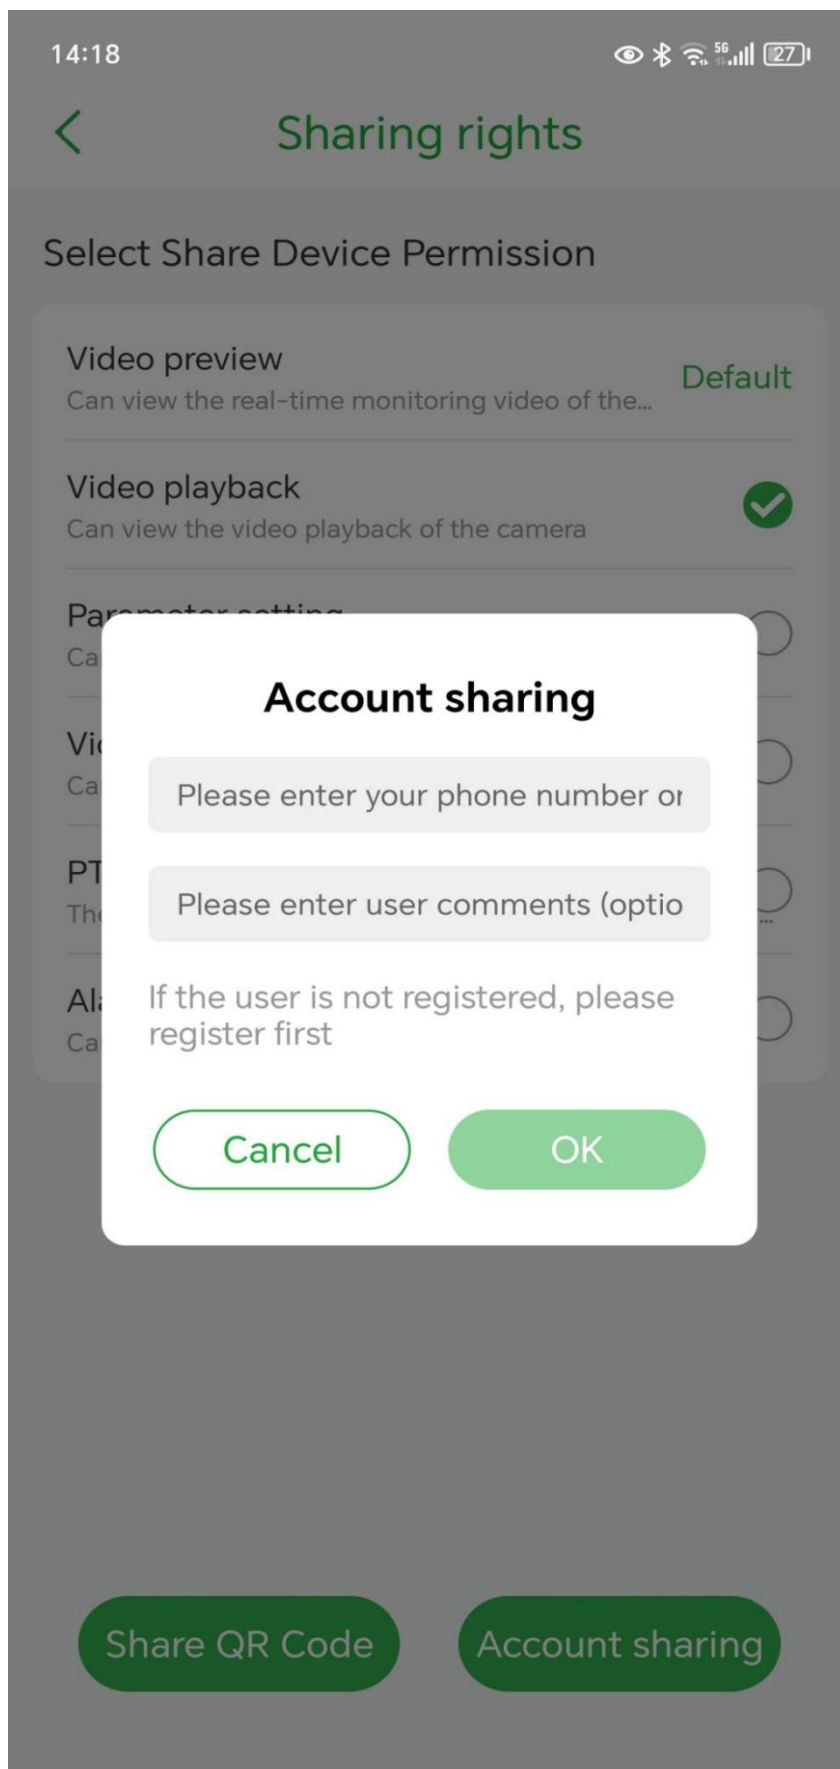

## 7: Set sharing permissions

[The permissions shared by the main account to sub accounts, for example: XX account can only view but cannot replay or control the gimbal. Allocation can be specified and checked according to needs]

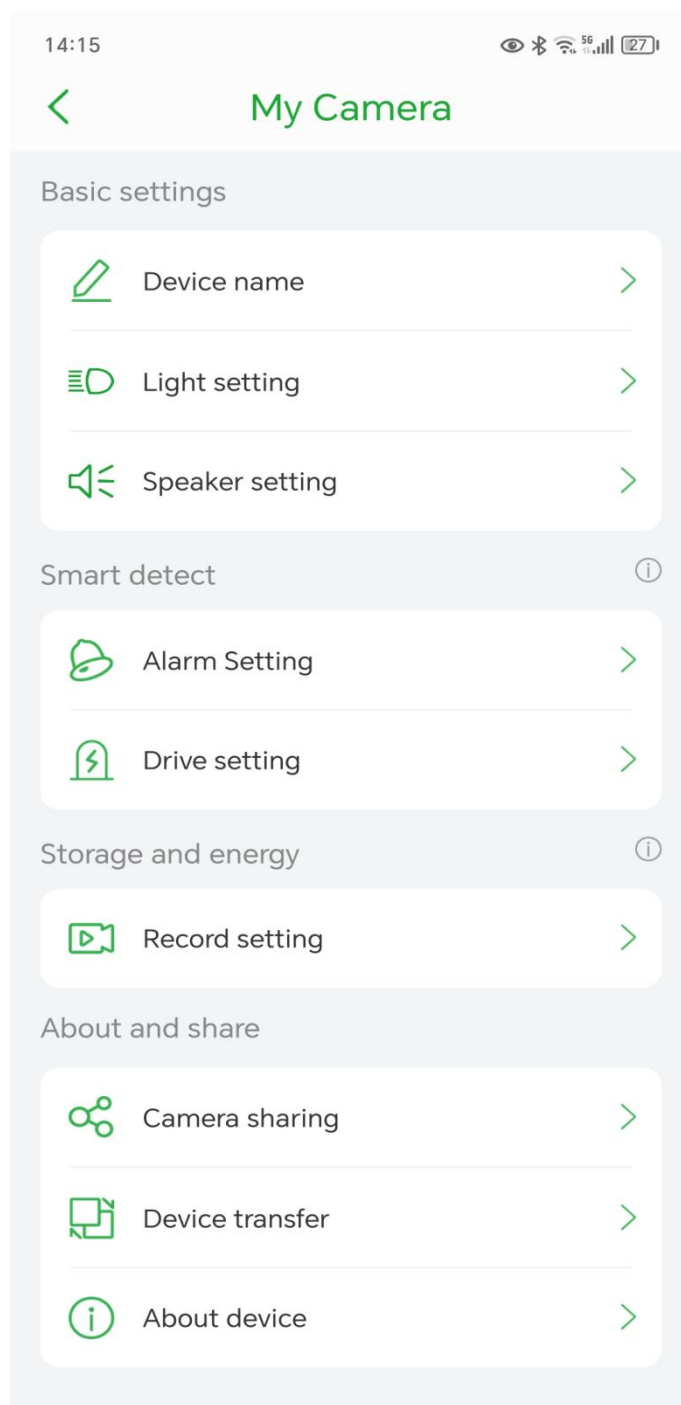

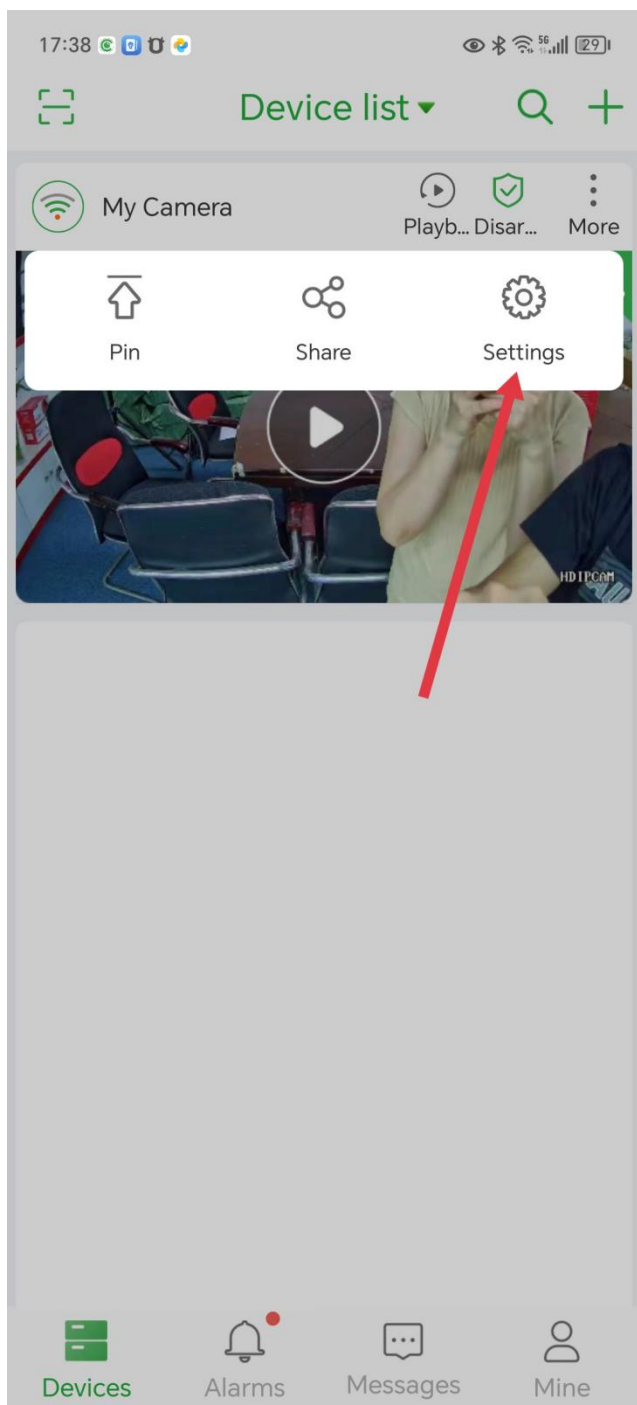

## 8: Transfer the device to other users

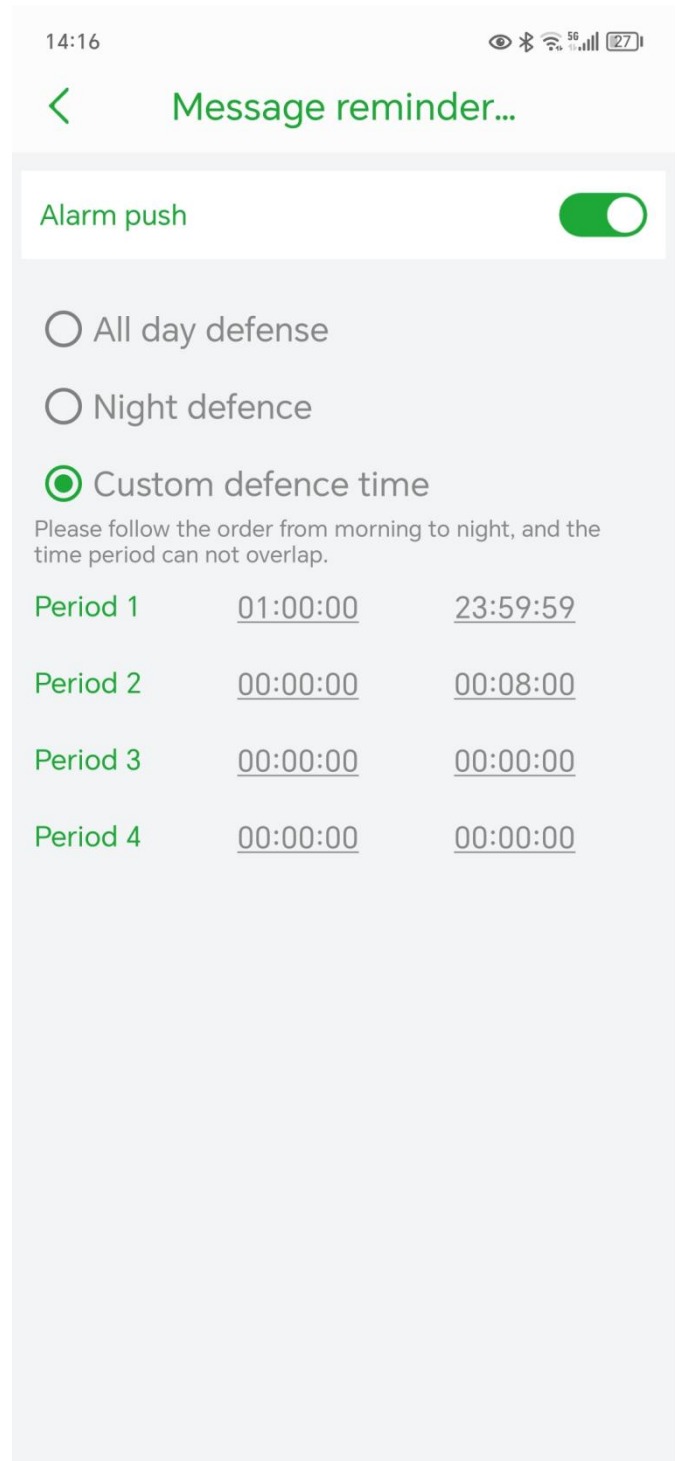

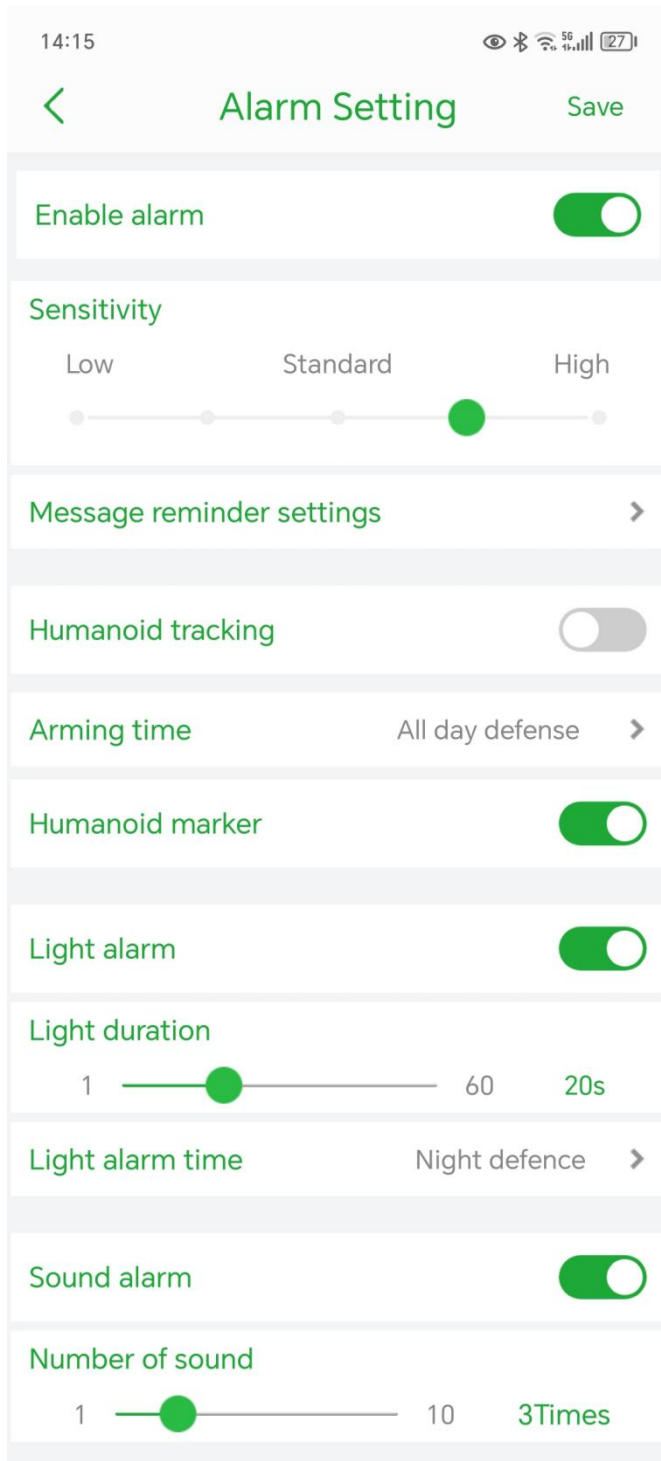

## 9: Function setting interface

## 10: Set information push time according to requirements

This camera also supports wired connections and NVR access.
